CREME CICATRISANTE

50 ML

● ACTIVE INGREDIENTS:

Centella asiatica:

also known as tiger herb, with multiple virtues: cell healing & regeneration, tissue repair, action on micro-circulation...

Mimosa tenuiflora:

an antibacterial and antifungal treatment, regenerating skin tissue and stimulate circulation.

Vitamin E:

Protects cells against oxidation, which damages them, and against external aggression. and relieves eczema.

Dexa-panthenol:

Ultra-healing, soothing and restorative, promoting growth, stratum corneum resistance and cell renewal

Allantoine:

Used in the treatment of wounds, burns, skin ulcers and irritations. It helps regeneration of damaged tissue and acts as a healing gas pedal.

CICAFORT is a healing care of the burns, scars and skin injured.

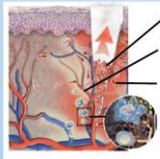

1. Mechanical action:

An oil-in-water emulsion that acts as a dressing on wounds and helps restore the hydrolipidic film.

2. Pharmacological action :

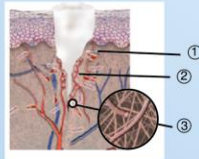

Anti-oxidant action to trap free radicals, combined with collagen synthesis activation, which helps speed up the process of skin rebuilding.

● MODE OF ACTION:

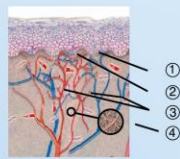

PHASE 1

- 1 Isolation.
- 2 Bactericidal effect.
- 3 Enhance the healing.

PHASE 2

- 1 Restores the hydrolipidic film.
- 2 Activates neoangiogenesis.
- 3 Activates fibroblasts.

PHASE 3

- 1 Effects the wound is colonized by fibrous tissue.
- 2 Provides flexibility and comfort to enhance the scar.

- Isolates and protects exposed and injured nerve endings producing thereby and analgesic effect.
- Supports the immune response to fight infection and promotes natural skin healing, as well as minimizing scarring.
- Promotes wound healing by activating and sustaining intrinsic regenerative potential of the body.
- Increases collagen formation and angiogenesis.
- Provides an optimum physiological moisture necessary for regeneration and skin repair.

STUDY

Several studies have been carried out in the university hospital Habib Bourguiba Sfax-Tunisia in three departments (maxillofacial surgery, Orthopedic Surgery and Traumatology, Surgery of the sequelae of extensive burns) in order to evaluate the effectiveness of Cicafort cream during post-operative and burns care for cicatrization purposes.

● INDICATIONS:

1/ In surgery :

- Fresh wounds (postoperative, traumatic,...)
- Burns (stage 1, 2 and 3).
- Abrasions, erosions, scratches.
- Loss of skin defect and chronic skin lesions (leg ulcers, heel: diabetic feet), bedsores.

2/ In dermatology :

- Dermo-surgery.
- Post pigment laser or post vascular laser.
- Erythemas: Solar in curative and preventive (preparation of the skin sensitive to sunlight).
- Dry Erythema.

3/ In gynecology :

- Breast Cracks (shallow and deep latch).
- Caesarean and episiotomy.
- In postoperative.

● INSTRUCTIONS FOR USE:

Apply CICAFORT to the damaged area 3 to 4 times a day until completely repaired.

● INGREDIENTS:

EAU DISTILLÉ, GLYCERYL STEARATE, PEG-100 STEARATE, ALCOOL CETYL STEARIQUE, CARBOMER, EDTA, POLYSORBATE 20, BEURRE DE KARITÉ, HUILE D'AMANDE DOUCE, CYCLOPENTASIOXANE, DIMETICONE, ISOPROPYL MYRISTATE, C12-15 ALKYL BENZOATE, MONO PROPYLÈNE GLYCOL, ALLANTOINE, D-PANTHENOL, TOCOPHEROL ACETATE, TRIETHANOLAMINE, EXTRAIT DE MIMOSA TENUIFLORA, EXTRAIT DE CENTELLA ASIATICA, SODIUM POLYACRYLATE, HUILE DE PARRAFINE, TRIDECETH-6, PHENOXYETHANOL, ETHYLHEXYL GLYCERINE.

HEALING ACTION

- Centella asiatica
- Mimosa tenuiflora
- Vitamin E
- Dexa-panthenol

REPAIRING ACTION

- Allantoine

● RECOMMENDATIONS OF USE :

After disinfection, wash the wound with saline and apply a thick layer of CICA**FORT** cream.

- Burns and loss of skin substances (3 - 4 applications per day): cover with a sterile dressing moistened with saline.
- Surgical wounds (1 to 2 applications per day): cover with a sterile dressing.
- Nipple cracks: (3 to 4 applications per day) on the nipple.
- Chronic skin lesions (1 to 2 applications per day): fill the lesion under sterile dressing moistened with saline.
- Carefully remove exudates and necrotic tissue with a sterile dressing, before CICA**FORT** reapplying

CICA**FORT** : is a restoring skin cream formulated from 100% natural ingredients.

CICA**FORT** : has proven success in aiding the body's natural healing assisting recovery rates significantly.

CICA**FORT** : is recommended for the treatment of various skin conditions such as wounds, burns, leg ulcers, diabetic feet.

CICA**FORT** : promotes quality of healing by reducing scarring.

CICA**FORT** : help to cool and sooth the affected skin.

CICA**FORT** : protects wounds from potential infection.

CICA**FORT** : minimizes pain and the use of analgesics.

CICA**FORT** : is suitable for adults and children.

DERMALIPS

LIP BALM

DRY & CHAPPED
LIPS

REPAIRING
MOISTURIZING
SOFTENING

DERMALIPS is a daily moisturizing care for dry and chapped lips. It soothes, protects and moisturizes intensely. Apply as often as necessary. For external use only.

• ACTIVE INGREDIENTS:

Shea butter

Shea butter is rich in saturated and unsaturated fatty acids such as stearic and oleic acids, making it ideal for nourishing chapped and/or dry lips. It also helps protect them from external aggressors (sun, wind, rain).

SWEET ALMOND OIL

Sweet almond oil has moisturizing and repairing properties. Enriched with essential nutrients, it helps regenerate and protect lip skin. It forms a shield that retains moisture and prevents damage caused by external aggressors, helping to rebuild and preserve their health.

Vitamin E

When it comes to treating chapped, dry lips, vitamin E is particularly effective. It acts as a moisturizer, giving lips a smooth, soft, full texture, and also helps to treat dull lips, restoring their natural tint.

• RESULTS :

before

after

• COMPOSITION :

Sweet almond oil, shea butter, beeswax, lanolin, vitamin E tocopherol acetate, aroma

DERMALIGHT

ANTI-SPOTS DUO

DUO CREAM & GEL
'FOR EVEN & LUMINOUS
SKIN'

FOR ALL SKIN TYPES

NIGHT
CARE

DAY
& NIGHT
CARE

DERMALIGHT KERATOLYTIC GEL is a night-time skin care product designed to reduce dark spots and even out skin tone.

ACTIVE INGREDIENTS :

DERMALIGHT gel combines :

- **AHAs (ALPHA HYDROXY ACIDS)** : help thicken the epidermis and increase collagen production, reducing fine lines, leaving skin firm and smooth. Ensuring a gentle peel.
- **Salicylic acid** : is a powerful active ingredient. Among its many properties, it is commonly used on the skin for its overall anti-imperfection action. Thanks to its astringent properties, salicylic acid has a keratolytic action on the skin's surface.

INSTRUCTIONS FOR USE :

Apply DERMALIGHT gel two or three times a week in the evening after cleansing and drying your skin thoroughly.

COMPOSITION :

Distilled water, alcohol denat, carbomer, EDTA, triethanolamine, acide salicylique, alpha hydroxy acides, monopropylene glycol, polysorbate 20, phenoxyethanol Ethylhexyl glycerine, perfume

DERMALIGHT CREAM is a dermatological day&night skincare product enriched with alpha arbutin to even out brown spots on the face, neckline and hands.

ACTIVE INGREDIENTS :

- **Alpha arbutin**: reduces the appearance of spots, scars, hyperpigmentation and age spots by inhibiting melanin production.
- **Shea butter**: A daily application of shea butter to the skin, before sunscreen, will protect it from UV rays and limit the appearance of dark spots. What's more, its antioxidant properties help prevent oxidative stress.
- **Sweet almond**: Sweet almond is renowned for its benefits to the skin, particularly as an anti-spot agent. Thanks to its richness in vitamin E and essential fatty acids, it helps deeply moisturize the skin while reducing pigmentation spots and skin imperfections. Its brightening action helps even out skin tone and reduce the appearance of spots, leaving skin brighter and more radiant.

INSTRUCTIONS FOR USE :

Apply DERMALIGHT cream to spots on face, neckline and back of hands.

COMPOSITION :

glyceryl stearate, PEG 100 stearate, alcool cetyl stearique, carbomer, EDTA, Polysorbate 20, beurre de karité, huile d'amande douce, cyclopentasiloxane, dimeticone, isopropyl myristate, c12-15 alkyl benzoate, mono propylène glycol, allantoiné, D-panthérol, tocophérol acetate, triethanolamine, alpha arbutin, sodium polyacrylate, huile de paraffine, trideceth-6, phenoxyethanol, ethylhexyl glycerine, perfume.

RESULTS :

Avoid exposure to the sun after application of the product, and in case of exposure apply appropriate sun protection.

GEL ANTI-DOULEUR

GEL-Cream 50ML

Arthromove
Gel cream

Ingredients :

Harpagophytum procumbens:

Harpagophytum procumbens is particularly effective for treating inflammation and relieving pain. It is effective in relieving aches and pains in the lumbar region and reduces joint pain, including that associated with osteoarthritis.

Methyl salicylate:

Methyl salicylate, a member of the NSAID class, inhibits prostaglandin synthesis, thereby reducing swelling and infiltration of inflamed tissue. Methyl salicylate has analgesic properties.

Menthol:

Menthol has the ability to stimulate cold-reactive chemical receptors. Anti-inflammatory: Indirect action through vasoconstriction, reducing edema and inflammatory reactions. Analgesic: Direct action by reducing the conduction velocity of small-caliber nerve fibers.

Essential oils:

- Clove essential oil
- Eucalyptus essential oil
- Rosemary essential oil
- Peppermint essential oil
- Lavender essential oil

Arthromove is an analgesic and anti-inflammatory cream that combines cryotherapy and aromatherapy to relieve aches and pains in muscles and joints.

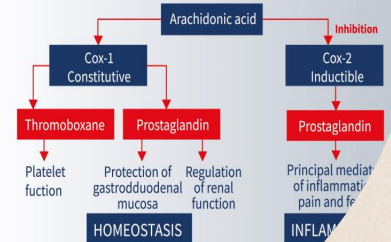

Mode of action

Cryotherapy : provides a feeling of cold which helps to reduce inflammation, muscle spasms, rehabilitation of post-traumatic swelling, increasing mobility, and reducing pain by slowing nerve impulses.

Enriched with essential oils: Rosmarinus officinalis oil, Mentha piperita oil, Eucalyptus Globulus oil, Harpagophytum procumbens and menthol, most important elements and particles that have a role in cryotherapy due to their analgesic, anti-inflammatory, and cooling properties.

Aromatherapy:

Arthromove Gel cream is enriched with organic essential oil of clove (Eugenia caryophyllus) rich in eugenol (90%) known by its inhibitory action of cyclooxygenase, specially cox-2, ensuring anti-inflammatory, analgesic and anesthetic actions.

Assessment of patient satisfaction, survey of orthopedic surgeons

The interest of this study is to know from which application the patient begins to find satisfaction in cases of moderate to severe pain.
